

Interactive Digital Art and Design SE608

Project Proposal Year IV

Student Name:	Jake Kelly	Student Number:	C00299948
Working Title:	WEB PET		
Description:	WEB PET is an interactive game where users create, customize, and care for a virtual character through a web browser. Players can choose their character's appearance, name, personality and customise the home of a character. They must feed, play with, and interact with the character. A character's mood, hunger or energy, will change dependent on regular use		
Reasons for selecting project:	I am interested in interactions within designs, having well-fortified technical structures the game should give the user the freedom to create their own character, with the possibility of developing a connection with a character. This project will allow me to work with heavily stylized websites.		
Proposed research content:	This website is focused on how encouraging the game is with its regular usage, which should benefit from the following content: UI interaction and Website navigation, Simple and Accessible. Game's Atmosphere. Custom characters' design and implementation. The character's statistics (ex. Mood). Custom room(s) with customisable furniture. Rewards, tasks, and games.
